

INTERVIEW PREP

The ISEE exam is only one aspect on which your child is being evaluated when applying to secondary school. The interview is crucial because it gives your child a chance to differentiate themselves from the other applicants. The interview can be very stressful and cause a tremendous amount of anxiety. Team Test Prep will help your child prepare for the interview so they feel relaxed, confident and positive about the process. Being prepared leads to successful interviews.

ADVANTAGES OF INTERVIEW PREP

Relieve stress • students who practice answering potential questions are less nervous at their actual interview because they will have thought through and discussed potential answers.

Practice, practice, practice • not only are the answers important, but the tone in which they are delivered weighs heavily. Often times the student's tone can be incorrectly conveyed to their interviewer. For example, confidence can sound arrogant and being overly polite can make the candidate seem insecure. We work with your child not only on the content of their answers, but also how to deliver their message.

Turn the tables • every interviewer will ask your child "do you have any questions for me?" Many candidates do not take this opportunity to show their interest about the school. We will help your child devise relevant questions to ask their interviewer.
Answer questions – our skilled "mock interviewers" are prepared to answer your child's questions about everything from what to wear to thank you notes.
